Theoretical and Applied Fracture Mechanics 13 (1990) 257
Elsevier

AUTHOR INDEX

Volume 13 (1990)

Benak, T., see C. Poon (2) 81–97

Chalkley, P.D. and R.J. Chester, The influence of tropical exposure on the durability of graphite/epoxy laminates (2) 137–144
Chao, C.K. and S.Y. Lin, Failure stability of a cracked layer between dissimilar materials (1) 59–68
Chester, R.J., see P.D. Chalkley (2) 137–144.
Clark, G., see D.S. Saunders (2) 105–124

Diaz, G., see P. Kittl (3) 251–255

Fisa, B., see T. Vu-Khanh (1) 11–19

Gao, Q. and H.W. Liu, The development of physically based micro-mechanics - based on the characteristic tip field of dislocation pileup (3) 181–191
Gould, R., see C. Poon (2) 81–97

Heller, M., T.G. Ryall and R. Jones, Thermomechanical assessment of damage in composites (2) 145–153

Ji, F.S., see J.H. Zhao (3) 217–224
Jones, R., see C. Partridge (2) 99–104
Jones, R., see M. Heller (2) 145–153

Kasap, S.O., see S. Yannacopoulos (1) 53–58
Kittl, P., G. Diaz and M. Morales, Determination of Weibull's parameters on flexure strength of round beams of aluminum-copper alloy and cast iron (3) 251–255
Krishna Murty, A.V., Analysis of delaminations in laminates (2) 155–160

LaBarbera, A., M. Marchetti and S. Tizzi, Stress distribution in cracked thin cylindrical shells: Series expansion (1) 39–51
Lai, J.H., see K.C. Wu (3) 239–249
Leicester, R.H., Failure in two-cycle fatigue (2) 161–164
Li, C.T., see G.C. Sih (1) 69–80
Lin, S.Y., see C.K. Chao (1) 59–68
Liu, H.W., see Q. Gao (3) 181–191

Marchetti, M., see A. LaBarbera (1) 39–51
McClintock, F.A., see S.J. Wineman (1) 21–27
McClintock, F.A., see S.J. Wineman (1) 29–37
Morales, M., see P. Kittl (3) 251–255

Partridge, C., R.T. Waechter, J.F. Williams and R. Jones, Understanding delamination behaviour in a circular laminate (2) 99–104
Pindera, J.T. and G. Wang, Critically of local three-dimensional stresses in a symmetric adhesively bonded joint (1) 1–9
Poon, C., T. Benak and R. Gould, Assessment of impact damage in toughened resin composites (2) 81–97;
Preuss, T.E., see D.S. Saunders (2) 105–124

Raghavendra Rao, M.N., see K. Rajaiah (2) 125–135
Rajaiah, K. and M.N. Raghavendra Rao, Damage assessment in composites through NDE: Some recent studies in India (2) 125–135
Ryall, T.G., see M. Heller (2) 145–153

Saunders, D.S., G. Clark, T.J. van Blaricum and T.E. Preuss, Graphite/epoxy laminate coupon testing programme (2) 105–124
Sih, G.C. and C.T. Li, Initiation and growth characterization of corner cracks near circular hole (1) 69–80
Sih, G.C., Initial damage states of hypervelocity impact for tungsten projectile on aluminum target (3) 167–180

Tizzi, S., see A. LaBarbera (1) 39–51
Tvardovsky, V.V., Further results on rectilinear line cracks and inclusions in anisotropic medium (3) 193–207

Van Blaricum, T.J., see D.S. Saunders (2) 105–124
Vu Khanh, T. and B. Fisa, Effects of fillers on fracture performance of thermoplastics: Strain energy density criterion (1) 11–19

Waechter, R.T., see C. Partridge (2) 99–104
Wang, G., see J.T. Pindera (1) 1–9
Williams, J.F., see C. Partridge (2) 99–104
Wineman, S.J. and F.A. McClintock, A. saw-cutting test for estimating stress intensity at a rail web crack due to residual stresses (1) 21–27
Wineman, S.J. and F.A. McClintock, Residual stresses near a rail end (1) 29–37
Wu, K.C. and J.H. Lai, Anti-plane steady state crack propagation in elasticviscoplastic material (3) 239–249
Wu, X.R., see W. Zhao (3) 225–238
